

**Dr. Deganit Paikowsky** is an expert on International Relations with a unique focus, and first-hand experience, in space policy as well as cyber policy and strategy. Currently, Deganit is part of the Strategy and Capacity Building Division of the Israel National Cyber Directorate and a lecturer at the Graduate

Program for Security and Diplomacy Studies at Tel Aviv University. Over a period of 17 years, Dr. Paikowsky developed a comprehensive understanding of current and future trends of global activity related to these domains. Her newly released book, "The Power of the Space Club", was published by Cambridge University Press. Deganit was a Post-doctoral Fellow at the Leonard Davis Institute for International Relations at the Hebrew University for two years. As a Ph.D. candidate, she won the Guggenheim Pre-Doctoral Fellowship of the National Air and Space Museum, Smithsonian Institute, and was a Visiting Scholar at the GW Space Policy Institute.

Deganit was part of the establishment team of and later Academic Director for the Yuval Neeman Workshop for Science, Technology and Security at Tel Aviv University. In this capacity she developed the research portfolio and established two excellence centers on global space activity and global cyber activity, which support governmental decision making process in these areas. From 2012 - 2016, Dr. Paikowsky served as the coordinator of the Space Committee of the Israel National Council for Research and Development, which operates under the auspice of the Ministry of Science and Technology. Deganit was a Fellow of the 2017-2018 International Women's Forum Leadership Foundation Program. She is a mother of three boys.
