

Laurent BERNAT is policy analyst at the OECD Secretariat in the Digital Economy Policy Division, where he works on digital security policy issues. Laurent supports the activities of the Working Party on Security and Privacy in the Digital Economy (SPDE) and Committee on Digital Economy Policy (CDEP). He led the development of the 2015 OECD Recommendation on Digital Security Risk Management for Economic and Social Prosperity which forms the basis for current OECD work on digital security. Laurent is currently working on the revision of the 2008 OECD Recommendation on the protection of critical information infrastructures and manages the OECD Global Forum on Digital Security for Prosperity. Since 2003, Laurent worked on many different trust-related policy issues including national cybersecurity strategies, digital identity management, RFID, cryptography policy and the protection of children online.
