

Roy Cohen works at the big data division in the Ministry of Health, where he manages de-identification for healthcare studies. Roy also manages several big data research initiatives, such as a multi-institute machine learning algorithm that classifies ICD codes from free text in operation notes. Roy co-leads the Ministry of Health's FHIR task force. Outside of healthcare, Roy is an award winning documentary filmmaker ("Machine of Human Dreams", 2016). Previously, Roy had founded the healthcare startup StoryCare and did research at MIT and Weill-Cornell Medical Center. He has a dual master's (M.Sc, M.Eng) in Information Science from Cornell University and The Technion, and a B.A. in Neuroscience from Harvard.
